Disclosure of Financial Relationships: Invited Speakers**

It is the policy of University of Minnesota that the information presented at University of Minnesota-sponsored CME activities will be unbiased and based on scientific evidence. To help participants make judgments about the presence of bias, University of Minnesota and the American Association for Cancer Research are providing information that speakers have disclosed about financial relationships they have with commercial entities that produce or market products or services related to the content of this CME activity.

This pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. The intent of this policy is not to prevent a speaker with a potential conflict of interest from making a presentation. It is merely intended that any potential conflict should be identified openly so that the listeners may form their own judgments about the presentation with the full disclosure of facts. It remains for the audience to determine whether the speaker's outside interests may reflect a possible bias in either the exposition or the conclusions presented.

Additional disclosure information will be published in the *Proceedings Supplement*.

Relationships are abbreviated as follows: F, Full-time employee of listed company; C, Consultant/formal advisory committee; S, Stockholder; G, Grant support; H, Honoraria; D, Development of educational material; SB, Speakers' Bureau; P, Product royalty/licensing fees; O, Other.

Disclosure of Financial Relationships: Abstract Authors**

It is the policy of University of Minnesota that the information presented at University of Minnesota-sponsored CME activities will be unbiased and based on scientific evidence. To help participants make judgments about the presence of bias, University of Minnesota and the American Association for Cancer Research are providing information that abstract authors have disclosed about financial relationships they have with commercial entities that produce or market products or services related to the content of this CME activity.

This pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. The intent of this policy is not to prevent an author with a potential conflict of interest from making a presentation. It is merely intended that any potential conflict should be identified openly so that the listeners may form their own judgments about the presentation with the full disclosure of facts. It remains for the audience to determine whether the presenter's outside interests may reflect a possible bias in either the exposition or the conclusions presented.

Relationships are abbreviated as follows: E, Full-time/part-time employee; C, Consultant/formal advisory activities; S, Stockholder; G, Grant support; H, Honoraria; ED, Development of educational materials; SB, Speaker's bureau; L, Product royalty/licensing fees.
