Business Cards

Just like an in-person meeting, attendees are able to drop their business cards off to directly connect with exhibitor contacts (think of this as a fishbowl). With the Virtual Business Cards, exhibitors will collect data from attendees to increase their marketing efforts and to build your database of prospective clients.

1-1 Exhibitor Chat Virtual

Provides the option to network with attendees using the one-to-one chat function designed to increase engagement and make quick connections. Virtual Networking is a critical component in order to create meaningful connections. Attendees and Exhibitors have the convenience of chatting at anytime and anywhere.

Real Time Metrics on Deliverables*

$500

Exhibitors will have the opportunity to add a customized, personal dashboard to view real time data, including event interactions and leads. By using this feature, exhibitors can see at a glance who is clicking on any of their elements. The dashboard becomes a critical piece to marketing as companies are then able to capture interest in real time. Target marketing becomes much more precise when you know the level of interest from your prospects.
