

THE FACE OF THE BEAST

Julie Chessell, Registered Nurse

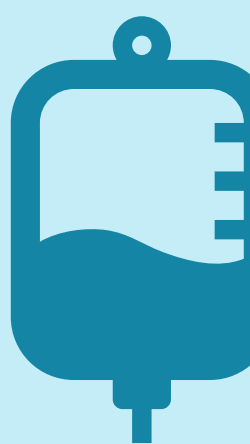

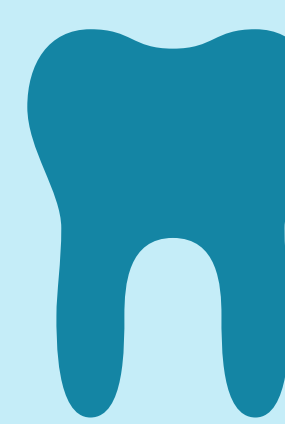

WHY US?
WHY NOT US!
WE WERE GIVEN THIS DIAGNOSIS IN ORDER TO CHANGE
CANCER GLOBALLY!

The Face of the Beast that we call CANCER comes in many forms. Cancer does not discriminate for age, race or geographical location. The journey is universal. People all around the world are faced with the gut wrenching moment where they can either let this ugly monster succumb them or make a courageous decision to tear this BEAST down. This is why we need to share our journeys, to share experience, and to contribute research.

Let's Collaborate

SUMMARY: As we work towards a common goal, we become unified. We all must come together collectively to raise our level of conscious awareness to achieve partnerships for cancer research. We are called to come together to pool our knowledge, our resources, our contacts and most importantly our hearts. Let's all brainstorm. We can become the heroes and change makers in others lives!!!!
