

Mission

Our mission is to provide free, individualized navigation to help patients and loved ones manage a primary brain tumor diagnosis, overcome treatment obstacles, and facilitate access to quality health care and treatment options.

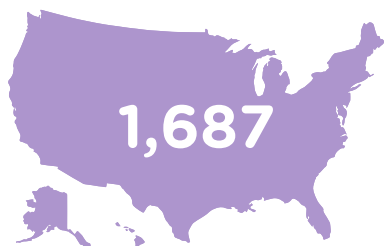

Our navigators are professionals guiding patients and caregivers through every phase of brain tumor care with personalized one-on-one support, education, and options.

Our services are free, unbiased, and available to patients across the United States.

Team Approach

- Nurse Navigators
- Social Work Navigators
- Health Information Assistants
- Medical Advisors

Our Impact

*Data from 11.1.2014 - 12.31.2021

Navigation Services

Disease and Treatment Options Education

- Comprehension of diagnosis and interventions available
- Biomarker research

Personalized Clinical Trial Search and Enrollment Assistance

- Utilization of internal proprietary clinical trial matching system
- Education on trial requirements and design
- Facilitation of trial screening
- Eliminate barriers to trial enrollment

Second Opinions and Treatment Center Identification

- Local and national brain tumors center of excellence
- Facilitation of medical records and imaging
- Consultations based on tumor pathology

Social Work Support Services

- Access to care
- Emotional support & connection
- In-home care needs
- Advanced care planning
- Financial assistance & resources
- Insurance guidance

Proprietary System

A customized platform, BrainCloud, was developed to centrally house all patient data which could be easily accessed, tracked, and searched.

The ability for Brain Tumor Network to be more efficient and strategic in their patient navigation is related to BrainCloud's function to:

- Search the network for clinicians and institutions with tumor-type specific expertise
- Link patient relationships across multi-institutional and multi-disciplined care teams
- Leverage navigator team experience across patients for more efficient operations
- Log all patient interactions across a patient's care journey
- Run clinical trial searches through our custom developed Clinical Trial Matching platform
- Access to source medical records and other reference materials
- Facilitate patient engagement with communication tools and satisfaction surveys
